

Wood fuel pellets

Belarusian Universal Commodity Exchange (BUCE) is currently hosting regular export trades with wood fuel pellets.

Pellets are eco-friendly biofuels made from compressed wood chips with no chemicals added.

New Belarusian pellet factories produce industrial-grade and premium-grade pellets compliant with ENplus A1 standard and can be used both – in industrial boiler houses and in domestic boilers.

Pellets traded on BUCE meet all the requirements of STB 2027-2010 standard.

Properties and dimensions:

Diameter	6 – 8 mm
Length	up to 50 mm
Moisture content	7 – 10 %
Ash content	1.4 – 1.8 % (up to 2.5%)
Heat output	17.3 MJ/kg
Sulfur content	0.05% +/-0.005%
Bulk density	min 650 kg/m ³

Terms of delivery: DAP – border of Belarus or FCA – consignor's warehouse (Belarus).

Goods are dispatched from the manufacturer's warehouse by road or railway (loaded in bulk). Optionally, pellets can be packed in big bags of 800 – 900 kg (subject to additional charges).

FSC, PEFC, SBP certificates are available.

Terms of payment – prepayment (100%).

Approximate starting price for 6 mm WFP1 pellets (made from softwood):

FCA – consignor's warehouse (Belarus) – 90 EUR/t;

DAP – border of Belarus – 105 EUR/t.

Approximate starting price for 6 mm WFP3 pellets (made from softwood and hardwood mix):

FCA – consignor's warehouse (Belarus) – 75 EUR/t;

DAP – border of Belarus – 100 EUR/t.
